Application for Certificate

Instructions:

- Use separate applications for changes that are not related to each other.
- Include sketches or pictures showing design, sizes, colors, materials, etc. (a sketch is worth a thousand words).
- File five copies of the completed application at an HDC meeting; or mail, e-mail or give them to a commission member for filing at the next meeting.
- It is recommended that applicants attend the meeting or send an agent. Even well prepared applications generate questions and answering them quickly will avoid delays.
- Certificates expire a) after one year if the work was not started and pursued diligently, or b) in case of sale.
- If you have any questions, please contact the Commission.

Detailed Description

This application is for a state of the art Micro Guard gutter system made of heavy gauge 032 aluminum that is white and virtually invisible from the street.

The micro-perforation leaf shedding system placed on top of the gutters, and not visible unless you are on top of the roof, will keep the gutters clear of debris allowing water to flow freely through the gutter trough and downspout and away from the house. This will help prevent the chronic water damage we experience to the wood around the base of the house that also contributes to the wet basement.

The entire house is currently being washed, scraped and painted and we would intend to put this new gutter system in place when the painting is complete. We would like to look our best for the 250th anniversary of the town!

This system is chosen for its effectiveness and because it will not affect the look of the roofline and will be virtually invisible from the curb. This would be an important factor in the continued preservation of this historic house.

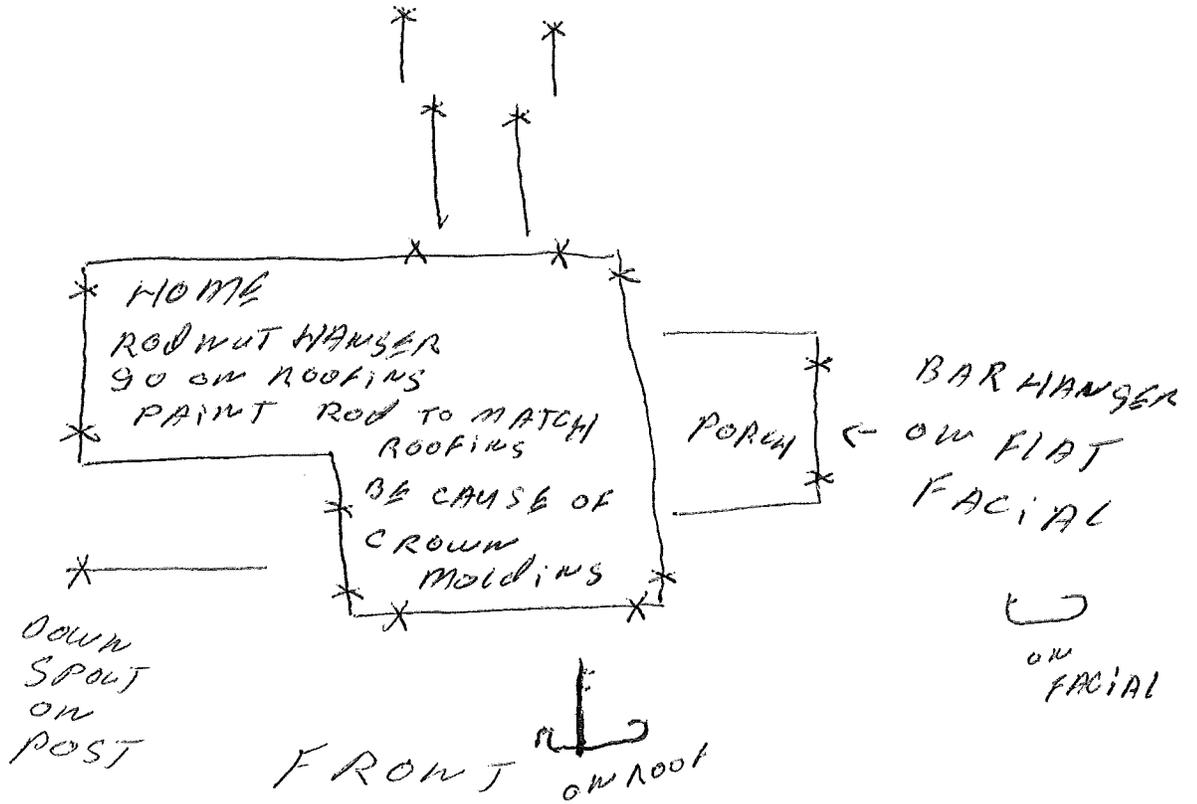

Brochures and samples of the gutter are attached.
