Description of changes (attach additional sheets and exhibits if necessary):

The proposed work consists of several low stone walls around a garden along with minor edging border stones. The garden currently exists but is severely sloped. In order to level the garden surface, some small retaining walls are needed. The walls on the south side will not exceed 20 inches in height (but may be less depending on final shaping of the surrounding ground) and flare into ground level. The wall will be made of field stone.

The garden is on the northeast corner of the property adjacent to Frye Hill Road. The attached figures illustrate the garden. The stone walls labeled "Wall A" and "Wall B" will be visible from the road.
