Short description of the proposed changes. (Provide the details on page 2 and on additional sheets and exhibits as necessary).

We propose to add a gutter to the south side of the garage with the down spout going down the west corner, then across the back/ west side. The gutter would be of the same type that is on the main house. This is in an attempt to resolve an issue with water going under the slab and compromising the structure of the garage.

Detailed description

I have emailed along with this application 4 photos. Three of the garage and one of an installed gutter on the main house. The gutter would be exactly the same type but the mounting hardware may vary.
